

**Title:** Your Dream Website: Client Discovery Survey

---

## Welcome!

I'm genuinely excited about working on your website, and I want you to feel the same way. This is your opportunity to be completely open and honest about what you like, what you don't, and what you wish your website could be — without worrying about overstepping some invisible line.

There are no wrong answers here. Clear communication matters to me, even when it's something I might not want to hear — and that goes both ways.

Think of this like planning a new kitchen or buying a new car. It's not just about replacing what you already have; it's about rethinking how it should work, how it should feel, and what you want it to do for you day to day. The possibilities are wide open.

Don't worry about cost, technical limitations, or what you think is "realistic." This is about understanding your ideal outcome. We'll handle shaping that into something practical later — together.

Take your time, be honest, and enjoy it.
